Web Development

HTML
CSS (SASS)
JavaScript
React
Node.js
Express

PROJECTS I WORKED ON

BOOKI Web Site: FrontEnd, HTML CSS

This site, coded in HTML, is a mockup of an online accommodation website, allowing users to filter their searches based on various criteria.

Portfolio Sophie Bluel: FrontEnd, JavaScript, HTML, CSS

This portfolio of a professional spatial designer, created with JavaScript, showcases her various projects. The site owner can log in using a security token to dynamically add, modify, and delete projects.

Nina Carducci Web Site: JavaScript, SEO, Optimized Web site, Resolved Bugs

A professional photographer's website, where I had the opportunity to debug and optimize the site, as well as improve its SEO to enhance its search engine ranking.

Kasa Web Site: FrontEnd, JavaScript, React, SASS

A mockup of a short-term rental site that I coded from scratch using React and SASS. It allows users to navigate through various rental listings and view details about the offered services via a photo carousel, descriptions, and the average client rating.

Mon Vieux Grimoire Web Site: BackEnd, JavaScript, Node.js, MongoDB, Mongoose

A backend project developed with Node.js, using Express and Mongoose, that allows users to create an account, add books to the database, rate, modify, and delete them. MongoDB is used for data storage, with security measures ensured by JWT and Bcrypt. This project helped me strengthen my skills in building secure RESTful APIs.

SKILLS

Git

Agile development

SEO optimization

Microsoft Office: (Word,
Excel, Powerpoint)

Sound Recording: (voice,
music...)

Sound and Video editing

Problem Solving and

Communication Skills
